

SMART
Communications, Inc.

DATA SHEET

MAXit for PTC Arbortext Editor

SMART Communications, Inc., New York City, is an *Artificial Intelligence (AI)* boutique specializing in language simplification of *technical* manuals with the PTC Arbortext Editor.

The **MAXit Checker for Arbortext** uses 19,000+ AI rules and controlled vocabularies to help technical writers create clear, concise and simple technical documentation.

The **MAXit Checker** is a plug-in for PTC Arbortext Editor, versions 6.X to 8.2.

The **MAXit Checker** reads .xml or .dita files, navigates the <tags> and creates color-coded messages. The writer clicks on a message to see the suggestions and edits the text inside Arbortext Editor.

The **MAXit Checker** can check Arbortext documents by element, text selection, table or document. All graphics are ignored and the style is not changed. The program includes a tool to create six sigma quality reports. Before the return to a content manager, the MAXit markers and colors are automatically removed.

The **MAXit Checker** is a popular tool to check for compliance to ASD-STE100 Simplified Technical English, S1000D, S3000L, ATA2200 and military specifications. To protect classified information in aerospace and defense, the **MAXit Checker** is in the secure Arbortext \\Custom folder. The program is cybersafe, on-premises with no external connections.

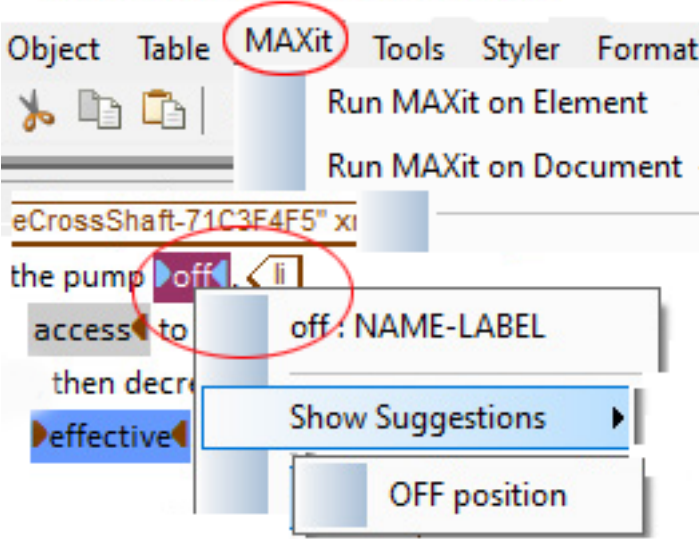

PTC Arbortext Editor Technical Requirements:

The **MAXit Checker** is a plug-in to PTC Arbortext Editor. Visit www.ptc.com for information.

The **MAXit Checker** links to the Arbortext menu and ACL scripts.

List of Features:

- Information is easier to read, understand and translate.
- Ideal for aerospace technical publishing.
- Small vocabulary for faster training and skilling.
- Short sentences for easier comprehension and readability.
- Creates text for computer-aided language translation.
- Removes *nice-to-know*, *keeps the need-to-know*.
- Simple click and edit interface. There are no confusing reports.
- Removes engineering-ese, idioms and jargon.
- Six sigma and traffic light tools for instant QA/QC quality report
- Standardizes product nomenclature.
- Enforces a global style and company standard.
- Easy compliance to S1000D, ATA2200 and other regulatory formats.
- Uses the concept of ONE WORD • ONE MEANING.
- Enforces clear, legally defensible language for warning labels.
- Improves text readability on mobiles and small devices.
- Allows a *do not translate* <tag> control.
- Includes a Word Finder to search dictionaries online.
- Includes a Verb Finder to search for the correct STE verb.
- Includes online Help with STE examples.
- Shares dictionaries for internal collaborative authoring.
- Makes post-editing of machine translation faster and at a lower cost.

Smart Communications offers a Starter Kit for one MAXit for Arbortext license and starter dictionaries from our library. The Starter Kit is ideal for proof-of-concept. The dictionaries can be expanded through SMART text mining for any product or service.
