Communications, Inc.

DATA SHEET

MAXit for Adobe FrameMaker

SMART Communications, Inc., New York City, is an *Artificial Intelligence (AI)* boutique specializing in simplification of technical manuals with Adobe FrameMaker, unstructured and structured (.dita).

The **MAXit Checker for FrameMaker** uses 19,000+ AI rules and controlled vocabularies to help the technical writers create clear, concise and simple documentation. The **MAXit Checker** is a plug-in for Adobe FrameMaker, versions FM2020 to FM2022. Older versions by special request.

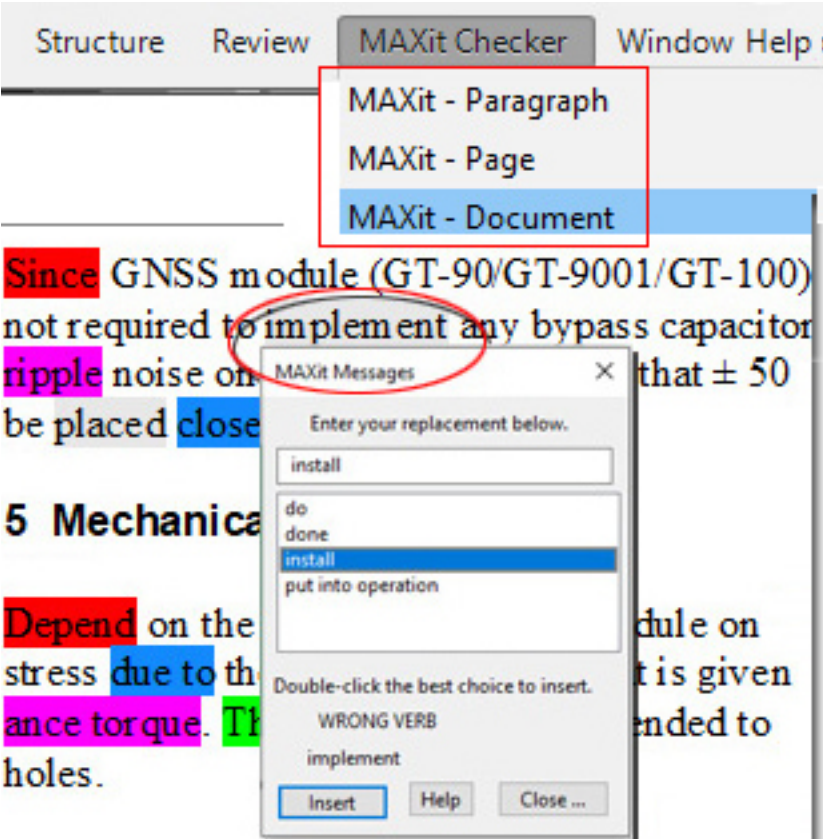

The **MAXit Checker** reads the text and creates color-coded error messages. The writer clicks on a message to see the suggestions and edits the text inside FrameMaker.

The **MAXit Checker** can check FrameMaker text by paragraph, page, table or document. All graphics are ignored and the style is not changed. The program has a tool to create a six sigma quality score. After analysis, the program automatically removes all the **MAXit Checker** markers.

The **MAXit Checker** is an ideal companion to the excellent FrameMaker features that include book building and publishing tools to create high-quality output in multiple ePub formats.

FrameMaker Technical Requirements:

The **MAXit Checker** is a plug-in to Adobe FrameMaker. Visit adobe.com for information. The **MAXit Checker** links to the FrameMaker menu.

- List of Features:
- Information is easier to read, understand and translate.
